

Turbo Air Scrubber with HEPA Filter (MI-11650)

Because the presence of fine airborne dust particles in your workshop can contaminate spray finishes and also affect your long-term respiratory health, an ambient air filter is a worthwhile investment.

The Magnum Industrial MI-11650 turbo air scrubber with HEPA filter is made for home workshops and small woodworking businesses. It's equipped with a two-stage electrostatic HEPA filtration system that captures the finest particles and allergens as small as 0.3 microns. This ultra-fine dust is often missed by your dust collector. And since it cleans the air in your shop while you work, it continuously filters the dust and debris created when hand sanding with portable electric tools. If you want to breathe clean air in your shop, look no further than this compact, powerful unit.

Features:

- Electrostatic HEPA two-stage filtration system cleans the air while you work
- Filters capture ultra fine dust and allergens as small as 0.3 microns
- Dual filters can be washed and reused multiple times
- Three-speed fan moves up to 850 CFM
- Induction motor provides continuous operation when needed
- Heavy-duty low-profile cabinet includes steel hanging hooks

Specifications:

Motor: 1/6 HP, 120V, 1 PH, 2A
Air volume: 680, 770, 850 CFM
Filter rating: 0.3 micron
Filter cycle: 20 times per hour (400 sq-ft)

Noise level: 59 dBA
Dimensions: 14" x 16.5" x 10.6"
Weight: 21 lbs (9.5 kg)
