

Grinder Stand with Metal Dust Collector (MI-12910)

The Magnum Industrial MI-12910 Metal Dust Collector is a space-saving, effective solution to control airborne metal dust—and help prevent health hazards created by metal dust. Its 1/2 HP motor moves up to 472 CFM of air, collecting metal debris and shavings via its 5" inlet, which is split to accommodate two connections. This unit is equipped with a non-flammable filter and easy-to-empty drawer, which holds the debris. In addition, the MI-12910 is designed to save space—it doubles as a stand and can support machinery up to 300 lbs. CSA approved.

Features

- Stand holds up to 300 lbs, so you can mount a grinder or sander onto the metal dust collector
- Easy-to-empty drawer holds filings and shavings captured by the dust collector
- Anti-spark filter media is non flammable
- Onboard storage trays provide convenient access to water or paste
- Includes filter, reducer, inlet caps, and brackets for mounting on the floor
