

Heavy-Duty 12" Disc Sander (MI-16240)

**Built-in
Brake Slows
Disc After
Shut Down**

The MI-16240 is made to efficiently sand workpieces of various shapes and sizes. Whether it's wood, plastic or metal — no problem! Simply install the right PSA disc and get started. The MI-16240 is up for the job. The Magnum Industrial Heavy-Duty 12" Disc Sander has a tilting cast-iron table with crossing mitre slots and included mitre gauge. These features make it easier to perform repeatable tasks, especially helpful for busy production shops, educational facilities and serious woodworking enthusiasts.

Safety features include a CSA-approved guard, safety interrupter switch, large STOP paddle and built-in brake that automatically slows disc rotation after the power switch is turned off.

Features:

- Cast-iron disc is precision ground, ideal for working with wood, metal and plastic
- Built-in motor brake slows disc rotation when the sander is powered off
- Burly direct-drive 1 HP motor spins disc at 1,720 RPM
- Large cast-iron table makes for a stable work surface
- Durable, precision-made bearings stand up to daily use and provide years of service
- Included mitre gauge and dual crossing slots add versatility and help ensure consistent results
- Onboard 2.5" dust port connects to your workshop's dust collection system for efficient dust control at the source
- On/off switch with large STOP paddle allows for quick, easy shut-down
- Safety interrupter switch prevents unwanted start-up
- CSA-approved safety guard covers one side for added safety
- Accepts 12" PSA discs

Specifications:

Motor: 1 HP, 120V, 1 PH, 12A
Disc diameter: 12" (305 mm)
Disc speed: 1,720 RPM
Table tilt: 15° to -45°

Dust port: 2.5" (63.5 mm)
Base dimensions: 16.5" x 16.5" (419 mm to 419 mm)
Weight: 99 lbs (45 kg)
