

Extendable, flexible and adjustable, the Magnum Industrial Roller Tables are like an extra set of hands in your shop. Transport lumber from one machine to another. Support heavy planks or wide sheets when feeding your table saw, planer or band saw. These roller tables adjust to align with almost any woodworking machine. They're flexible, so you can work around corners, and can be interconnected so you can handle longer and wider sheet goods more efficiently.

**250 lb
or 500 lb
Capacities**

Roller Table (MI-99020)

Features:

- Table adjusts from 23" to 36" high to align with a variety of woodworking machinery
